98% of respondents will use sensitive data on digitally transformative technologies.
What are your encryption strategies?
Federal use of sensitive data with digital transformation is widespread
less than 30% of respondents are using data encryption with these environments.
The reality of the multi-cloud agency
43% of respondents rated the complexity of enterprise environments as the top perceived barrier to implementing data security, higher than performance concerns, organizational buy in, perceived needs or budget.
Data breach resistance:
Few agencies are successful
60% of US Federal agencies say they have been breached at some point in their history, with…

35% … experiencing a breach within the past year alone.
Encryption rates are low within federal agencies.
agencies say they use encryption for the vast majority of use cases studied.
Data privacy and sovereignty regulations impact all agencies
When it comes to data security, respondents identified encryption and tokenization as the leading strategies to meet regulatory concerns.
Does your agency encrypt everything?
